TXU Energy purchases solar power and solar renewable energy credits from solar farms equivalent to your usage during Solar Days from 5:00 a.m. to 7:59 p.m. and wind renewable energy credits equivalent to your usage during Nights from 8:00 p.m. to 4:59 a.m.

Your average price per kWh each month is determined using the formula below based on your Monthly Billed kWh Usage.

Price per kWh = [Base Charge + TDU Delivery Charges per Month + (Monthly billed kWh Usage multiplied by the (Energy Charge + TDU Delivery Charges per kWh)) - ((Energy Charge + TDU Delivery Charges per kWh) multiplied by the applicable Nights kWh Usage)]/Monthly Billed kWh Usage

The total kilowatt-hour usage shown on your monthly invoice (Billed Usage) is provided by the Transmission and Distribution Utility (TDU). Usage for each time-of-day billing period shown above (Nights or Solar Days) is determined from interval data from your advanced meter (Interval Data) and is also provided by the TDU. If the Billed Usage and Interval Data do not match: 1) any missing intervals in the Interval Data will first be determined using market information for your usage profile, then these intervals will be proportionately adjusted so the sum of all intervals equal the Billed Usage provided by the TDU; or 2) if there is no missing interval information, each interval of the Interval Data will be proportionately adjusted so the sum of all intervals equal the Billed Usage provided by the TDU.

Average prices per kWh listed above do not include facility relocation fees or other charges ordered by a municipality. For information, please go to txu.com/municipalfees.

McAllen and Mission service area customers formerly served by Oncor will not be subject to the following AEP Central TDU Surcharges: Transition Charges 2 & 3, Nuclear Decommissioning Fee, System Restoration Charge and associated Accumulated Deferred Federal Income Taxes (ADFIT)
