

Be comfortable & energy efficient at home year round.

Westinghouse Silverdale ES™

7900.028 – \$145.00

Westinghouse's ENERGY STAR® ceiling fan is a perfect combination of style and energy-saving efficiency. Ceiling fan/light combination units that have earned the ENERGY STAR rating are about 50% more efficient than conventional fan/light units. And, for even greater efficiency, each fan includes a compact fluorescent light kit.

A larger (52") blade provides comparable cooling at a lower velocity than a smaller blade for quieter operation. This size blade is ideal for cooling larger rooms.

Air Circulation

Vornado® Flippi Personal Fan

5509.053 – \$29.99

A great desk fan for the office, or use in the kitchen or bedroom. This little fan will definitely increase your cool factor! The lustrous black complements the modern design.

Refreshes your space with 2 speeds and creates a quiet breeze in high style. Oscillates and flips to

direct air where you need it. *Measurements:* 6.7" L x 5.8" W x 9.25" H

Vornado® Undercabinet Fan

5509.031 – \$39.99

This sleek air circulator easily installs under your kitchen, laundry, or workroom cabinets. The V103 Undercabinet Circulator fan features a unique design that allows it to flip down and pivot 360° for

circulation, then flip up for discreet storage. With two speed control settings, air flow toggles between a near-silent low and a powerful 1700 rpm high setting.

Vornado® 630B Air Circulator

5509.024 – \$59.99

This Vornado® mid-size fan helps to apply the wind-chill effect indoors. The deep-pitched propellers move air up to 70 feet. Features include 3-speeds, sleek black finish and stable base.

Measurements: 12" L x 8.8" W x 13.6" H

Broan Big Heat™ Portable Heater

5507.342 – \$64.50

This portable electric heater helps keep you comfortable in drafty or cooler spots in your home or office. Ceramic heating elements offer

various speed and wattage settings — from 1500 watts for fast warm-up, to a more economical 1200 watt setting to maintain warmth. Features include built-in thermostat, automatic shut-off if tipped

over, and overheat protection that will shut off the heater (and turn on a caution light) when excess heat is detected.

Save energy and money, without sacrificing comfort:

- Ceiling fans, table fans and floor fans create a wind chill effect that will make you more comfortable in your home, even if it's also cooled by natural ventilation or air conditioning.
- If you use air conditioning, a ceiling fan will allow you to raise the thermostat setting about 4°F with no reduction in comfort. Install a fan in each room.
- Turn off ceiling and/or floor fans when leaving a room.
