

Be comfortable & energy efficient at home year round.

Honeywell 7 Day Thermostat

5000.219 – \$99.00

This Honeywell 7-Day Touchscreen Programmable Thermostat is effortless to use. It offers top-of-the-line features like touchscreen interaction, a real-time clock and a large, easy-to-read backlit display. You can program each day differently — up to 4 periods per day. The thermostat's Smart Response Technology continually adjusts the pre-heating/cooling of your home so you are comfortable at your programmed times. It will automatically change from "Heat" to "Cool" settings as needed, and features precise comfort control of +/-1°F for maximum comfort. A filter change reminder you will keep your heating/cooling system operating at peak performance. This thermostat is compatible with most heating systems, cooling systems, and heat pump systems. It does not work with electric baseboard heat (120-240V).

Honeywell 5-1-1 Thermostat

5000.221 – \$69.00

Honeywell's 5-1-1 Day Programmable Thermostat lets you program weekdays separate from Saturday and Sunday.

The 5-1-1 Thermostat is a very easy-to-use programmable thermostat with intuitive logic that responds to your choices and schedule for optimal comfort and energy savings. The large, backlit display shows room temperature, set temperature and current time all at once. This thermostat is compatible with most gas and oil heating and electric cooling systems that are 24-30 volt and some heat pump systems. It does not work with electric baseboard heat. *Measurements: 5.75" W x 4.5" H x 1.25" D*

LuxPro PSP511LC Thermostat

5000.1 – \$33.60

The LuxPro thermostat is easy to program, and easy to use. If you need just one schedule

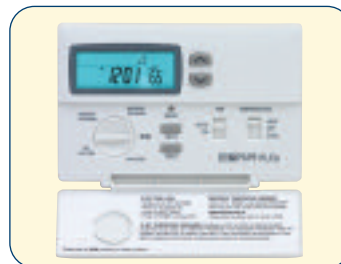

during the weekdays, and one schedule for the weekend, this thermostat is ideal. It allows for 4 periods per day heating/cooling, has a large, lighted LCD display, battery-free memory storage, and temporary and vacation overrides. It is suitable for use with single stage heating/cooling systems, oil heat, gas heat, 24 volt millivolt, and single stage heat pumps. *Measurements: 5.75" W x 4.5" H x 1.25" D*

Lux Everything Stat

5000.15 — \$75.00

The Lux universally compatible Everything' Stat® offers highly accurate, fully programmable temperature control of single or multistage heating and cooling systems. It offers 4 periods per day, 7 day programming, and smart recovery. This programmable thermostat is suitable for use with most 24 volt heating and air conditioning systems, up to 2 stage heat/2 stage cool oil or gas systems, up to 3 stage heat/2 stage cool heat pump systems, 2 wire hydronic systems, 2 wire hydronic air handlers, and millivolt systems.

These products from Energy Federation Inc. (EFI) are for sale to customers of TXU Energy.

Thermostats

Save energy and money, without sacrificing comfort:

- Through proper use of a programmable thermostat you can save about \$180* every year in energy costs for a typical, single-family home.
- Avoid setting your thermostat at a colder setting than normal when you turn on your air conditioner. It will not cool your home any faster and could result in excessive cooling and, therefore, unnecessary expense.

*The \$180 savings assumes an 8 hour daytime setback and a 10 hour nighttime setback of 8° F in winter and 4° F in summer.
