

OUR PARTNERS

To continue a legacy of environmental stewardship, TXU Energy has developed a signature program, Committed to Community Growth, to provide trees statewide to neighborhood associations, schools, nonprofit organizations and municipalities to improve and beautify local public spaces. Through this program, TXU Energy supports and assists in the maintenance of the TXU Energy Urban Tree Farm, the nation's largest nonprofit urban tree farm.

DEDICATED TO
GREENING
NORTH CENTRAL
TEXAS

MISSION

Preserve, beautify and expand parks and other public natural green spaces in a six county area surrounding the City of Dallas and beautify our public streets, boulevards and rights-of-way by planting trees and encouraging others to do the same through educational programs that focus on the importance of building and protecting the "urban forest" today as a legacy for generations to come.

OUR HISTORY

Simply put, the motto of the Texas Trees Foundation (the “Foundation”) is the “GREENING OF NORTH CENTRAL TEXAS.” Renamed in 2003 to more accurately reflect its mission, the Foundation sustains a tree planting initiative for neighborhood parkways and medians, schools and other public open spaces, a tree growing facility to assure a healthy supply of trees for the future, and education programs to teach the importance and benefits of maintaining a healthy urban forest.

The Foundation received its Certification of Incorporation from the State of Texas in April 1982. Originally named The Dallas Parks Foundation, its founders established the organization as a resource to support the existing Dallas park system. In 1989, the mission of the Foundation was expanded to focus on the planting of trees in public open space. The tree planting activity of the Foundation has grown from providing several hundred trees per year to providing thousands of trees each year, all on public property.

Texas Trees Foundation is improving the quality of life throughout North Central Texas. Trees help to clean the air and water, conserve energy, reduce crime, increase property values, improve health and make our cities and neighborhoods more livable. We are planting for the future!

TREEMENDOUS PROJECTS

Through the Trees for Texas program, the Foundation grows native trees to use in projects throughout North Central Texas. Our two urban tree farms have 74,000 trees in production for planting in public spaces. The Foundation has completed hundreds of tree planting projects resulting in more than 139,000 new trees in our community.

Community Planting Projects

Texas Trees Foundation provides education and planting assistance to help neighborhoods, schools, communities and organizations plant and care for trees. Through our corporate sponsorship program, individual giving and foundation support we are better able to grow and plant trees.

Highway Beautification

In a joint effort with Texas DOT, more than 3780 trees have been planted along the Woodall Rodgers Freeway between North Central Expressway & Stemmons, at the interchange between Highway 75 & Woodall Rodgers Freeway and at the intersection of I-30 & Highway 80.

Pioneer Plaza

In 1995, the Texas Trees Foundation dedicated Pioneer Plaza to the citizens of Dallas. The magnificent bronze sculptures depict early trail drives of Texas longhorns. Pioneer Plaza is located across from the Dallas Convention Center and has become one of the most visited tourist attractions in Dallas.
