The Actual price/kWh is based on the current month's NYMEX natural gas price as described below. The Average Annual prices per kWh shown above are samples based on natural gas prices of \$2, \$4 and \$6 per MMBtu for a twelve-month period - your average price per kWh for electric service will depend on your usage and the current month's NYMEX natural gas price in accordance with the pricing formula below. The current month's NYMEX natural gas price is the last settled price of the NYMEX Natural Gas Futures Contract at contract expiration that is established by NYMEX in the final week of each month preceding the billing month. Billing month is defined as the calendar month in which a customer's meter is read by the Transmission and Distribution Utility (TDU). The pricing formula includes the following components:

Base Charge:		Per Month \$4.95
Energy Charge:	Month(s) All Months	Per kWh 3.2000¢
Natural Gas Factor:	Jun-Sep Oct-May	Seasonal Factor 0.01060 0.01060

TDU Delivery Charges will be passed through to customer as billed from the Transmission and Distribution Utility (TDU). For updated TDU delivery charge factors go to txu.com/tducharges.

This is an indexed product - your average price per kWh each month is determined using the pricing components above and is indexed to the NYMEX natural gas price using the predetermined formula below based on your actual kWh usage each month:

Price per kWh = (Monthly NYMEX Natural Gas Price multiplied by applicable Seasonal Natural Gas Factor) + (Energy Charge + TDU Delivery Charges Per kWh) + ((Base Charge + TDU Delivery Charges per Month)/Monthly billed kWh Usage)

To determine your current month's price, use the formula and pricing components above with your estimated monthly usage go to txu.com/marketedge, or call 1-800-242-9113 to talk to a representative.

Average prices per kWh listed above do not include facility relocation fees or other charges ordered by a municipality. For information, please go to txu.com/municipalfees.
