	Your average price per kWh each month is determined using the publicly available pricing above and the formula below based on your actual usage each month. To determine your current month's price, use this formula with your estimated monthly usage, go to txu.com/formula or call 1-800-242-9113.				
	Price per kWh = [Base Charge + (Applicable Energy Charge times applicable kWh)]/Total monthly kWh.				
	The total kilowatt-hour usage shown on your monthly invoice (Billed Usage) is provided by the Transmission and Distribution Utility (TDU). Usage for each time-of-day billing period shown above (Mornings, Evenings or Nights) is determined from interval data from your advanced meter (Interval Data) and is also provided by the TDU. If the Billed Usage and Interval Data do not match: 1) any missing intervals in the Interval Data will first be determined using market information for your usage profile, then these intervals will be proportionately adjusted so the sum of all intervals equal the Billed Usage provided by the TDU; or 2) if there is no missing interval information, each interval of the Interval Data will be proportionately adjusted so the sum of all intervals equal the Billed Usage provided by the TDU.
