Your average price per kWh each month is determined using the publicly available pricing components above and the formulas below based on your monthly billed kWh usage. **TDU Delivery Charges Per Month** and **TDU Delivery Charges Per kWh** will be passed through to you as billed from the Transmission and Distribution Utility ("TDU"). To determine your current month's price, input the pricing components and your usage into the formulas. For help determining your price and applicable NYMEX pricing, go to [txu.com/formula](http://txu.com/formula) or call 1-800-242-9113.

- Monthly NYMEX Gas Adjustment = Monthly NYMEX Natural Gas Price x Natural Gas Factor
- Natural Gas Factor Charge = Monthly NYMEX Gas Adjustment x monthly billed kWh usage
- Energy Charge = monthly billed kWh usage x price per kWh
- TDU Delivery Charges = TDU Delivery Charges per month + (monthly billed kWh usage x TDU Delivery Charges per kWh)

Price per kWh = (Base Charge + Energy Charge + Natural Gas Factor Charge + TDU Delivery Charges) / monthly billed kWh usage

Average prices per kWh listed above do not include facility relocation fees or other charges ordered by a municipality. For information, please go to [txu.com/municipalfees](http://txu.com/municipalfees).
